

EQUI-CALPHOS

C.F.I.A. Registration # 820257

A source of highly available calcium, mainly for fast growing foals and yearlings that require supplemental calcium, to avoid joint problems. At times, calcium is required for adult animals following an injury or for lactating mares to stimulate milk production.
Feed 60 - 100 gm daily.

Calcium Phosphorus Supplement for horses:
Calcium Actual.....22.5%
Phosphorus Actual.....16.0%
Fluorine (max.).....400 mg/kg

Ingredients:
A list of the ingredients in this feed may be obtained from the registrant or the manufacturer.

Feeding Instructions:
Offer 60-to-100 grams daily depending on the degree of activity along with their regular feeding and grazing program.

EQUI-CALPHOS
EQUI-CALPHOS is a source of highly available Calcium with Phosphorus. Prescribed mainly for growing foals and yearlings that require supplemental Calcium to avoid joint and osteo related problems. Extra Calcium is also frequently required following orthopedic injury or surgery and for lactating mares to help milk production. EQUICALPHOS provides 22.5% of chelated Calcium and 16% Phosphorus.
