**EQUINE-O-FORM**

EQUINE-O-FORM is a mineral/vitamin fortifier or feed supplement specifically formulated for broodmares and foals. It provides all necessary ingredients for a balanced diet when fed in conjunction with a quality hay and grain ration. Our multi-national supplier Hoffmann La-Roche, recommends a 2:1 Calcium to Phosphorous ratio for broodmares and growing horses. EQUINE-O-FORM guarantees 20% Calcium and 10% Phosphorous in each feeding, plus other essential elements such as Selenium, Vitamins A through K and blood builders Copper, Iron and Cobalt just to name a few.

Other important facts when considering EQUINE-O-FORM, are that in addition to being at efficacious levels the minerals are chelated for easier absorption and the vitamins are stabilized to prevent premature loss of potency. Both of these processes are routinely neglected by other companies.

EQUINE-O-FORM may also be fed to Calcium deficient horses or chelated Calcium is prescribed, i.e. bone fractures common to racehorses.

This fine product contains absolutely no useless fillers! It is very economical to feed and carries a permanent registration with the Canadian Food Inspection Agency.

**STABILIZED VITAMIN PER KILO:  
(MINIMUM)**

Vitamin "A" 750,000 i.u.  
Vitamin "D" 200,000 i.u.  
Vitamin "E" 500 i.u.  
Vitamin "K" 100 i.u.  
Vitamin "B-12" 1,400 mcg  
Riboflavin 400 mg  
Niacin 2,000 mg  
Ascorbic Acid 1000 mg  
Thiamin 100 mg  
Folic Acid 50 mg  
Pantothenic Acid 150 mg  
Choline 11,000 mg

**FEEDING INSTRUCTIONS:**

Feed 60 to 90 grams daily (1-3oz.) or mix this supplement at the rate of 20 kg per metric tonne of finished feed. Feeding vitamins other than vitamin A, D, E, riboflavin, pyridoxin and thiamin to horses may not have a beneficial effect.

**CAUTION**

Directions for use must be carefully followed.

**SUGGESTED FINISHED FEED**

Soybean Meal (48%) 80 kg Oats 860 kg  
E.O.F. Premix 20 kg Molasses 40 kg 1000 kg
