

EQUINE-O-LYTE

DIN 808172

<p>Restores electrolyte balance following an extensive workout (racing, showing, field work, etc). Also used for heat prostration (hot muggy days) or other stress problems (transportation). Feed up to 75 gm daily.</p>	<p style="text-align: center;"><u>EQUINE-O-LYTE</u></p> <p>EQUINE-O-LYTE restores electrolyte balance following an extensive workout or activity such as racing, eventing, endurance riding etc. Also prescribed for heat prostration or dehydration from illness. EQUINE-O-LYTE'S formula is unique. Not just salts and flavouring, it is specifically balanced with very high levels of vitamins, minerals, amino acids, salts and Dextrose to provide energy and replace lost nutrients to cells. Some of these ingredients include Folic Acid, Ascorbic Acid, Glycine and Calcium. This professional electrolyte is a must for serious competitors of all disciplines.</p> <p>EQUINE-O-LYTE has been endorsed by Dr. Bill Vandergrift, nutritional consultant to the Canadian Equestrian Federation and United States Equestrian teams.</p>
<p style="text-align: center;">Water-soluable Powder Vet Use Only</p>	
<p style="text-align: center;">ORAL ELECTROLYTES, VITAMINS AND DEXTROSE REPLACEMENT FOR HORSES.</p> <p>Containing: Mineral salts, Folic Acid, Vitamins C, K, Ferrous sulfate and Dextrose.</p> <p style="text-align: center;">INDICATIONS:</p> <p>As an aid in the treatment of electrolyte imbalance which can occur during hot weather, extensive training, racing, traveling and in case of diarrhea.</p> <p style="text-align: center;">SYMPTOMS OF ELECTROLYTE IMBALANCE:</p> <p>Dehydration, heat exhaustion, cramp and fatigue.</p>

ACTIVE INGREDIENTS PER 75 G

Menadione (Vitamin K) 12.5 mg
Folic Acid 14.0 mg
Ascorbic Acid (Vitamin C) 500.0 mg
Sodium chloride 9.0 g
Potassium chloride 4.0 g
Calcium propionate 1.75 g
Magnesium sulfate 1.50 g
Glycine 12.0 g
Sodium bicarbonate 10.0 g
Ferrous sulfate 0.24 g
Disodium phosphate 2.61 g
Monosodium phosphate 0.95 g
Dextrose 31.0 g

Direction for Use

Equine-O-Lyte can be added to food, an adequate water supply or given orally. As a daily supplement for all classes of horses use 37.5 g per day. Increase the daily dose to 75 g under the following conditions:

Recovery from extensive training or racing

During hot weather

Before and after traveling

Before racing to prevent cramp and fatigue.

A level scoopful is 35gm. by measure.

CAUTION: Should deficiency symptoms persist, contact your veterinarian for consultation

DIRECTIONS FOR USE

STORE IN A COOL, DRY PLACE.

REPLACE LID TIGHTLY AFTER USE.
